Blueberry

New Thornless **BOYSENBERRY**

Order by Catalog No. N-2815

The most profitable vine fruit in cultivation today, producing better than 6 tons of fruit per acre. Berries average 1 1/2 to 2 inches long and 1 inch thick. Vines are absolutely thornless, so don't confuse this with the old thorny variety. Flavor is a combination of Raspberry, Loganberry and Blackberry, from which it was crossed and originated. An outstanding fruit to serve fresh, for pies, jellies or to put in your freezer. Set plants 6 feet apart each way. Extremely hardy. 5 Plants \$1.40; 10 for \$2.50; 25 for \$4.75; 50 for \$8.50; 100 for \$15.00. Prepaid.

New Cultivated **BLUEBERRY**

Everybody loves Blueberries, but you really never have tasted any good ones unless you have eaten some of these Cultivated varieties. Fruits are as large as the end of your thumb. Produced in profusion on strong, stately bushes. They are different than most plants, requiring acid soil; therefore, before planting mix a little Peat Moss, sawdust or leaf mold with the soil to keep it acid. Berries grow in clusters like small bunches of Grapes. Sweet and mild with hardly any seeds. Fruit ripens from early July until the forepart of August. Plant no less than two to insure cross-pollinization.

My Garden and I

FOR more than a score of years, my garden and I have been good friends . . . friends that never bore, never impose and never inflict any penalties upon one another. We understand each other . . . and as a result . . . both of us flourish. But my garden is different from the average . . . vastly different.

For instance, in the average garden when one plants petunias, petunias come up and bloom . . . and if one plants radishes, radishes grow! But I repeat, my garden is different . . . I plant petunias, asters, zinnias and harvest in bountiful return . . . contentment, satisfaction, relaxation and appreciativeness.

In short, my garden gives me solace and quietude from a world of turmoil and strife . . . it is the one spot in my life, where, after the world extracts eight, ten and even twelve hours of physical and mental energy, I can gather to me a feeling of contentment, and rest, that try as I may, I cannot duplicate it in any other manner, believe me.

To start with, my garden is no different than that patch of ground outside your own doorstep . . . it starts out exactly the same as that . . . with dirt . . . the stuff for which children are scolded when they become too familiar with it . . . and yet, did you ever see a healthy normal youngster that didn't like to dig in the soil?

There's something warm and intimate in working with good growing-earth . . . and why not . . . does not life itself stem from the very earth? So, when I plant my garden I feel privileged indeed to stimulate to life the tiny live spark deep within each seed . . . I love seeds . . . small diminutive specks endowed

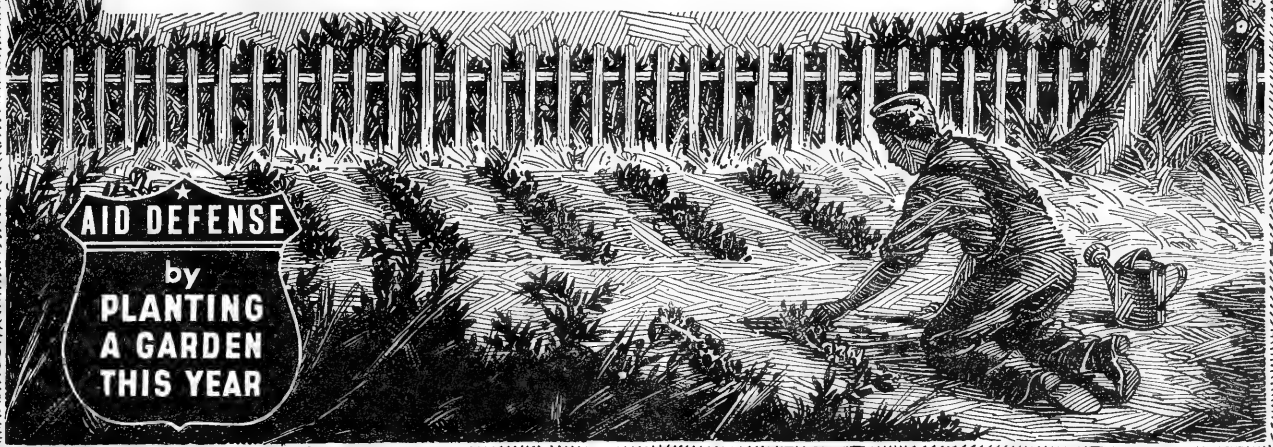

by God with the power to bring forth living testimony of Nature's greatness . . . it makes me stop and think . . . when I plant a seed! And when I realize that that privilege is mine, something inside me swells with a feeling that wipes away all man-made cares and tribulations.

Yes, gardening brings a man to his knees, right down to earth . . . and for most of us that's good . . . for too often do we walk among our fellow men with our noses held just a bit too high! But on your knees in contact with the moist soil, gently warmed by Spring's early sunshine, ah! that's the time you have a moment to yourself in which to relax and think about the worth-while things in life.

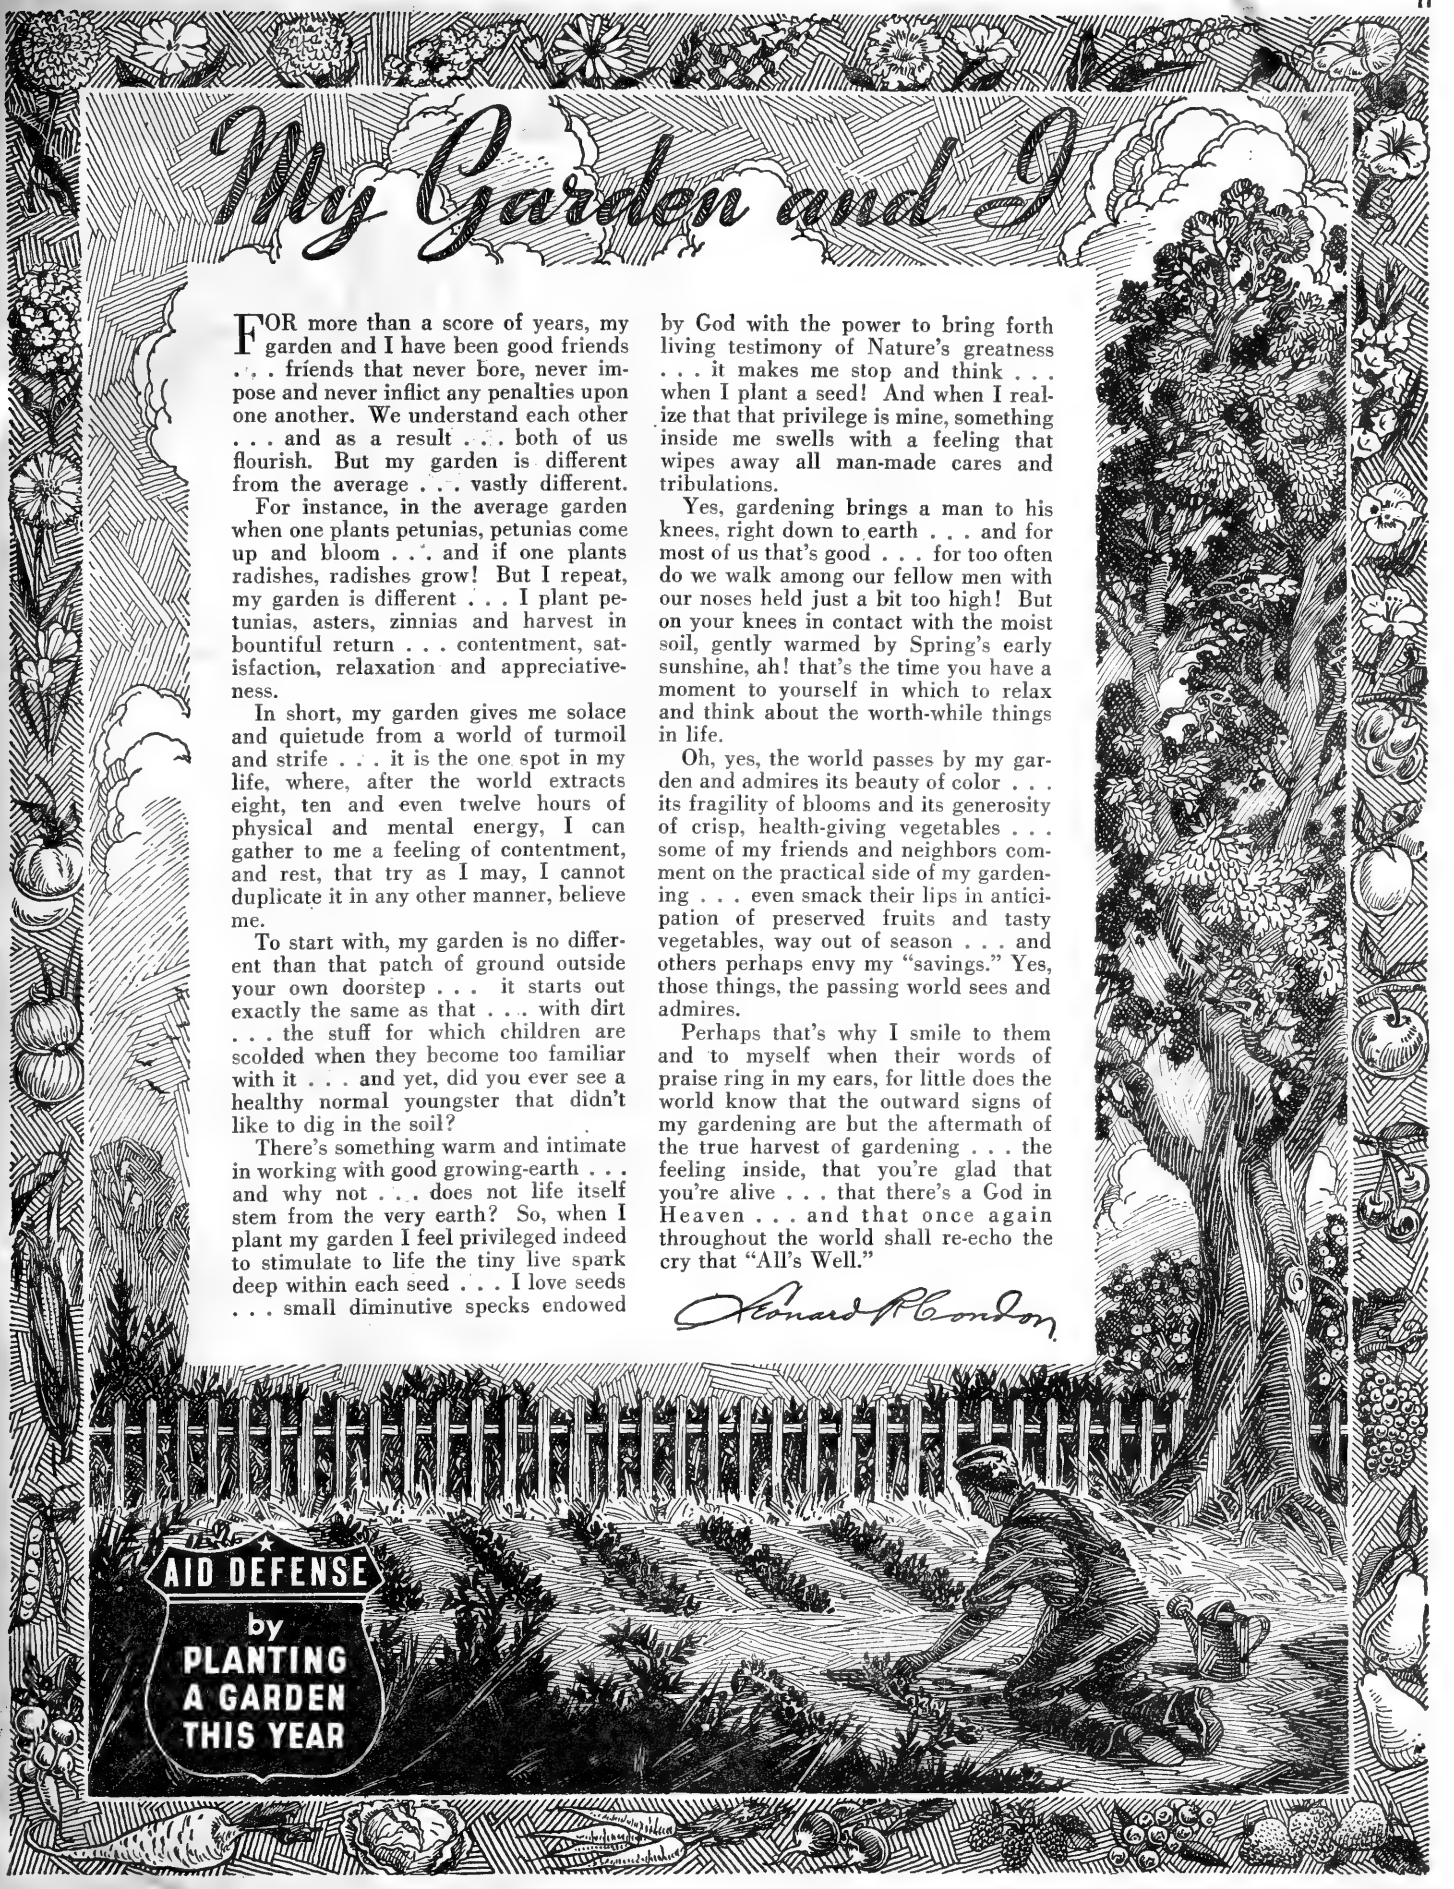

Oh, yes, the world passes by my garden and admires its beauty of color . . . its fragility of blooms and its generosity of crisp, health-giving vegetables . . . some of my friends and neighbors comment on the practical side of my gardening . . . even smack their lips in anticipation of preserved fruits and tasty vegetables, way out of season . . . and others perhaps envy my "savings." Yes, those things, the passing world sees and admires.

Perhaps that's why I smile to them and to myself when their words of praise ring in my ears, for little does the world know that the outward signs of my gardening are but the aftermath of the true harvest of gardening . . . the feeling inside, that you're glad that you're alive . . . that there's a God in Heaven . . . and that once again throughout the world shall re-echo the cry that "All's Well."

GLORIOUS-NEW HARDY Chrysanthemum

Named after my granddaughter, picture at the right
Mary Catherine "Curlyhead"

The twist and curls of these blooms are very similar to the twist and curls on the little girl's head pictured to the right, which prompted me to name this after my first Granddaughter.

Mary Catherine
granddaughter
6 yrs old

This new curly-headed Hardy Chrysanthemum, in our opinion, is the most beautiful and most satisfactory outdoor Mum yet introduced. The flowers are extremely large for an outdoor blooming variety, averaging 3 to 3½ inches across with 5 to 6 blooms on a single stem. If desired you can have much larger blooms by disbudding the side shoots and leaving only one bloom in the center.

When the buds first appear, they seem like a little ball of butter but as they unfold, twist and curl, they expand to a beautiful white with a tinge of lemon-yellow in the center making a contrasting color different than any other Mum. The plant is a vigorous grower, averaging 28" to 36" tall, deep green foliage, attractive leaves making a beautiful contrast between the blooms and foliage. Come into bloom forepart of September, furnishing an array of blossoms until severe freezing weather sets in. Ideal for garden display and unexcelled to cut for bouquets, to give to a sick friend and to beautify your own living room.

I wouldn't sell the girl in the picture for a million in gold, but you can have a few of these New Hardy Mum Plants, MARY CATHERINE "CURLYHEAD" if ordered promptly at the following special prices:

2 for \$1.00—4 for \$1.75
6 for \$2.40, postpaid.

NEW GIANT ZINNIA

That We Recommend for Your Spring Garden

2560 FLORADALE SCARLET ZINNIA

Outstanding New Flower

Here is a brand new Scarlet Red Zinnia with graceful flower form. The large blossoms, which grow 5 to 5½ in. across and about 3 in. deep, are made up of hundreds of strap-shaped petals which are ruffled and fluffed just enough so that the sparkling and lively color of the upper surface is softened by the effect of the sunlight glancing off the small re-curved portions of the petals. The petals are curved under, and twist gaily to create a harmonious and refined informality which dispels all thought of the stiffness heretofore associated with some types of Zinnias. Plants grow symmetrical bushes 2½ to 3 feet tall. Blooms on long stems. Ideal for cutting or mass plantings. Pkt. 25c; 2 pkts. for 45c.

Condon's Cannon Ball Cabbage—Extra Early

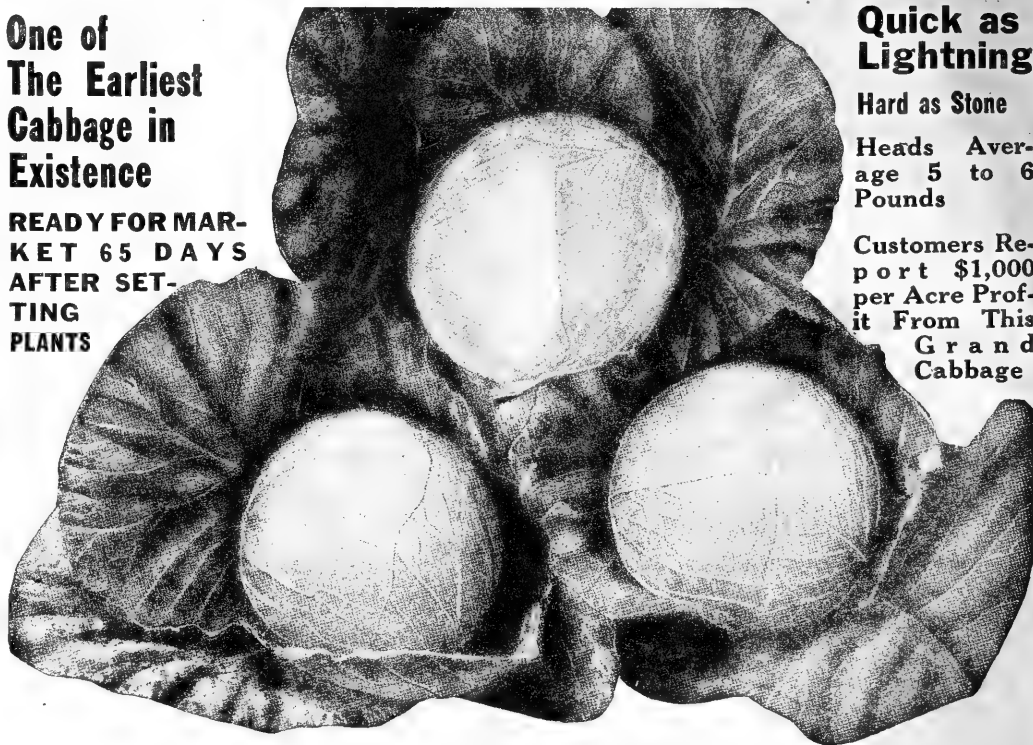

Universal Favorite Throughout the Nation

Catalog No. 249

Its evenness in maturing has proved it a great favorite with all Cabbage growers as they appreciate the great importance of being able to clear off the ground at one cutting, especially where room is required for a second crop. The plants are of compact, stocky growth, producing large, solid, ball-shaped heads which average about five pounds in weight, and are of the very finest quality, smooth with fine veins and small core. 309 New Super Snowball

This is the earliest of all varieties we have ever seen. It makes a firm, solid head 6 to 9 inches in diameter in about 85 days after sowing. Even under unfavorable conditions it will head up well, heads forming all at one time, showing a uniformity of size, shape, and type. The plants make a compact dwarf growth. The head is almost round. Has a beautiful pure white, smooth curd. Dry weather does not materially check its growth and therefore is able to resist diseases. Pkt. 35c; ¼ oz. \$1.00; ½ oz. \$1.75; oz. \$3.00; ¼ lb. \$9.00; ½ lb. \$16.00; lb. \$30.00, postpaid.

Condon Bros. Seedsmen Avilla, Indiana
Dear Sirs:

308 New Dry Weather or Danish Giant

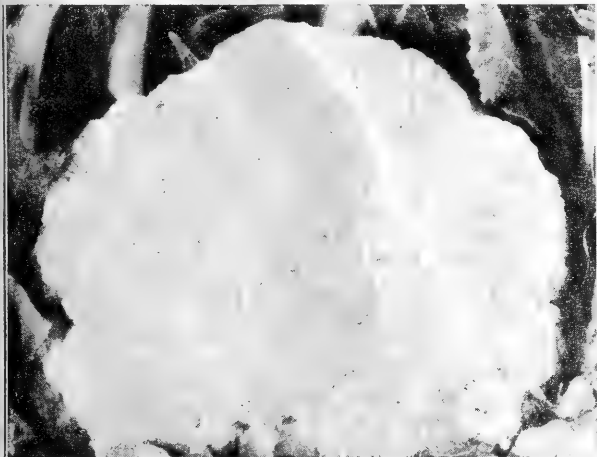

Though Cauliflower does best in a cool and moist season, in "Dry Weather" we have a variety which is actually drought-resistant and will produce heads when other varieties are a complete failure. It is of the highest quality, producing large, pure white heads, maturing a little later than Early Snowball. The heads are considerably larger than those of that famous variety. Individual heads weigh 2 lbs each. Pkt. 25c; ¼ oz. 85c; ½ oz. \$1.50; oz. \$2.50; ¼ lb. \$7.00; ½ lb. \$13.00; lb. \$24.00, postpaid.

307 Genuine True Extra Early Snowball

Splendid for forcing in the greenhouse and frames or outdoor culture. Brings a good price in the early market and stands shipping very well. Plants are dwarf; heads grow 6 in. and more in diameter and have a smooth, compact curd. They weigh about 1 ¼ lbs. each and often more if grown under favorable conditions. One of the best known. The seed we offer you is of the highest possible quality. Pkt. 25c; ¼ oz. 85c; ½ oz. \$1.50; oz. \$2.50; ¼ lb. \$7.00; ½ lb. \$13.00; lb. \$24.00, postpaid.

EGG PLANT

Delicious Vegetable—Easy to Grow. Include in Your Garden This Spring. 1 oz. of Egg Plant seed will produce about 1000 plants.

May be cooked in various ways. The fruits are at their best edible stage when the skin has attained a high gloss. Use when young, at which time the seeds will be small and hardly noticeable. Keep fruits picked off as they become ready and plants should bear until frost. A rich, sandy, warm soil produces the best plants and yields the highest number of fruits. Seed should be started in a hotbed, or indoors in shallow boxes, 8 to 9 weeks before the time to set the plants out in the garden. Don't plant in the garden until danger of frost is past.

330 Large New York Purple

This is an improved strain entirely spineless that we highly recommend for home and commercial planters. Plants 30 inches tall; very productive, bearing 4 to 6 or more large, handsome dark purple, symmetrical broad egg shaped fruits of the highest quality. The intensely brilliant coloring is uniform over the whole fruit. Pkt. 15c; oz. 75c; ¼ lb. \$2.00; ½ lb. \$3.50; lb. \$6.75, postpaid.

287 Condon's Select Danvers "Supreme Strain"

For Critical Market Gardeners and Private Planters
—The Earliest and Sweetest of All Table Carrots
Used Annually by the Largest Planters

Danvers carrots have been the standard for over fifty years and we need not try to offer any proof as to their popularity. Carrot-breeding is in about the same class as stock-breeding, and if same is not kept true, will deteriorate very quickly. We have endeavored to do more than keep the old parent sort true, and have actually bred up the quality of Danvers Carrot to such perfection that the old parent sort would be ashamed of itself. To distinguish our sort from others, we have termed our strain Condon's Select Danvers. Same has been bred for quality and for yield and on a given acreage it has produced a larger crop of marketable roots than any other garden or table variety. The roots are of a rich orange color, crisp and sweet. **Pkt. 15c; oz. 45c; ¼ lb. 90c; ½ lb. \$1.50; lb. \$2.75, postpaid.**

Often Making Better than 1200 Bushels from One Acre

Condon's White Queen Parsnip is a highly improved type, producing uniformly large and handsome roots of stocky form, heavy at the shoulder, well rounded, gradually tapering to the base, so that they are easily dug, and if grown in properly pulverized soil, the roots will be smooth and free from wrinkles and side roots. The flesh is white, of fine texture, free from core and stringiness, and especially fine flavored, cooking tender, sweet and rich, rendering it one of the finest of table vegetables for winter use. The roots being hardy may remain in the ground all winter or some may be dug late in the fall and stored in sand or soil, so that they can be easily procured when the ground is frozen. Frost improves their quality. This parsnip is the heaviest cropper of all, and we recommend it for both garden and field culture. Cushing, Okla., Aug. 28.

Condon Bros. Seedsmen.

Gentlemen: Last year I ordered some of your Supreme Perfection Muskmelon Seed at Springdale, Arkansas. I had some of the Seed left-over and planted 70 hills here at Cushing. I have raised lots of Muskmelon in the past, but this melon takes the head of the class.

Yours very truly, C. G. BATHE.

Ideal For Home Garden
Or Commercial Planters

Under proper methods of cultivation, melons weighing 50 lbs. or more are not unusual. The sparkling crisp red flesh is deliciously sweet clear to the rind. It is solid, with very few small white seeds. The outer skin is light green, striped and blotched with dark green, rather tough, and does not bruise easily. A good shipping melon because of the texture of the skin and the strength of the rind, and it will travel to distant markets and arrive in perfect condition. Produces sturdy, strong vines that carry a large number of melons. It has all the good qualities demanded by commercial growers and is perfectly adapted to the smaller home-garden. Enjoy this delicious melon fresh from your own garden this year. Pkt. 15c; oz. 40c; ¼ lb. 65c; ½ lb. \$1.00; 1b. \$1.85; 2 lbs. \$3.50; 5 lbs. \$8.50, postpaid.

500 Kleckley's Sweets No. 6—Wilt Resistant

Great 80 day Melon—"Sweetest of All"

Suitable for Shipping One to Three Hundred Miles

There is no melon superior in quality to a good strain of Kleckley Sweets. The bright scarlet flesh is the ideal of water melon quality—firm, crisp, entirely free from stringiness or cotton, and "sweet as sugar."

The melon is oblong in shape, about 20 inches in length by 10 to 12 inches in diameter. The skin is a rich dark green; the rind is thin and brittle, and for this reason the melon is not a good shipper to a distance beyond two or three hundred miles, but for home use and nearby market consumption it's got 'em all backed off the list. Our seed is all saved from hand selected, uniform, well shaped, fully matured, ripe melons. This extra care in selecting the melons from which the seed is saved costs a little more than the method generally used but it insures you seed of the highest quality with strong, vigorous germination. Pkt. 15c; oz. 40c; ¼ lb. 65c; ½ lb. \$1.00; 1b. \$1.85; 2 lbs. \$3.50; 5 lbs. \$8.50, postpaid.

About Condon's First of All Tomato

"Your First of All Tomatoes are wonderful. I made big money on my crop this year."—Fred G. Deishlie.

Gentlemen:

Dec. 25, Sioux Center, Iowa.

As we had a fine crop of your First of All Tomatoes we had about 2000 plants this year and harvested 500 Bushel of them. We want to praise them very highly, and besides that we enclose a photo of my husband holding a cluster in his hand with 42 well developed Tomatoes on it, and the same vine produced 84 more well grown Tomatoes, and the vine was full of blossoms. We were indeed very well pleased with them. Yours truly, Mr. & Mrs. Ed. Poel.

Gentlemen: I am sending you a cluster of your First of All Tomatoes, that I grew this year. This cluster contains ten large luscious tomatoes. Many clusters contained twelve to fifteen tomatoes. I don't see how the vine holds them up. They are the best I ever saw. I make big money on them.—Earl Mouck.

"The World's Greatest" Main Crop Tomato

Catalog Number 757

Originated on our Famous Rock River Valley Seed Farms. Better Today Than Ever.

Absolutely Coreless, Practically Seedless, Solid Meat, and a Beautiful Bright Red Color. If you don't give this grand variety a trial this year you are neglecting your own interests

In shape, CONDON'S PEERLESS is smooth, well formed and extremely deep from stem to blossom, making it unusually heavy. It ripens evenly to the stem and is without ridges or cracks; it has great meatiness and few seeds. It is firm without being hard, unrivalled home and market tomato. The vines are vigorous but compact. The joints are short and it always fruits in large clusters at every second joint, which accounts for its wonderful productiveness. Condon's Peerless is the heaviest for its size of any variety and, on account of its brilliant red color, depth and solidity, is one of the handsomest tomatoes. Its beautiful appearance and color make it sell ahead of all sorts, and its unusual solidity, few seeds and desirable form for rapid peeling without waste, make it a most desirable canning and slicing variety. It costs you no more; takes no more time to grow the best than it does to grow the more common sorts and we think you will find Condon's Peerless one of the Grandest Tomatoes you have ever grown. Be sure to try this year. Pkt. 25c; 1/2 oz. 60c; oz. \$1.00; 1/4 lb. \$2.75; 1/2 lb. \$5.00; lb., \$9.00, postpaid.

25 Tons Per Acre Common Yield
**Recommended to all
Northern Dairymen**

A fine strain of Southern grown open pollinated white ensilage corn, selected by ourselves, which has proved to be one of the most valuable and largest yielding ensilage corns in cultivation. It grows very tall, attaining a height of 12 to 14 feet; is prolific in its nature, having from two to three ears to the stalk, makes a heavy thick growth of fodder, and is altogether, in our opinion and in the opinion of those who have tested it, the best and most productive of ensilage corns. 1/2 lb., 30 cts.; 1 lb., 50 cts.; 2 1/2 lbs., \$1.10; 5 lbs., \$1.75; 10 lbs., \$3.00, postpaid.

Ft. Collins, Colo., Aug. 23
Gentlemen: Your "Silo King" Corn is everything you say. Our field of Corn stands 13 feet, 6 inches tall, each stalk has 1 to 4 ears of Corn and the greatest amount of foliage we have ever seen. This field is the envy of the surrounding territory and I'm sure there will be many acres planted next year. Yours truly,
William Scheller, Rt. 4, Box 172.

1309 FUNK'S-G-114-HYBRID SEED CORN—BEST BY TEST

Field Scene of One of Our Fields of "G"-114 Hybrid Seed Corn Grown Here at Rockford

Some people call it "intestinal fortitude." Others call it simply "guts." Anyway, in G-114, it's the ability to stand up against the beating that the North Central Corn Belt often hands out in weather and in insect attacks. Against cold spring dampness. . . . Against scorching summer drought. . . . Against blasting wind. . . . Against corn borers and other insect enemies. G-114 comes through. Even when harvest is long delayed, G-114 stands, firmly erect. In Iowa 4-year tests, its percentage of lodging was lowest (2.9%) of any strain entered. And it yields with the best. G-114 foliage stays green after the ear starts to mature, making the extra starch necessary to finish both a heavy ear and a strong stalk. 1/2 lb. 35c; 1 lb. 60c; 2 1/2 lbs. \$1.35; 5 lbs. \$2.50; 10 lbs. \$4.50, postpaid.

ALL ARE PERENNIAL UNLESS MARKED ANNUAL

**1398 Rye Grass—
Perennial**

Sow in spring or fall 25 to 30 lbs. per acre broadcast. Fastest growing of all Perennial Grasses. Makes excellent pasture and hay crop. Yields 2½ to 3 tons per acre. ½ lb. 42c; lb. 65c; 2½ lbs. \$1.50; 5 lbs. \$2.75, postpaid.

**1347 Hog Pasture
Annual**

Sow in early spring broadcast or with a grain drill 50 lbs. per acre. This is a well balanced mixture containing proper proportions of Canadian Peas, Soy Beans, Vetches, Crimson Clover, Rape, Sugar Cane, Millet, Turnip, Rutabaga, Barley and Oats. Has given universal satisfaction throughout the Corn Belt and provides an abundant pasture within 6 weeks from the day it is sown, continuing green and bountiful until destroyed by frost. ½ lb. 38c; lb. 60c; 2½ lbs. \$1.35; 5 lbs. \$2.40, postpaid.

**1418 Sweet Sudan
Annual**

Sow in spring 25 to 30 lbs. per acre. Leads them all for a mid-season or summer hay crop, and with a combination of Soy Beans will outyield anything in the list for mid-summer feed. Average yield 3½ tons per acre. No better feed available. Can be sown as late as August for late summer and early fall crop. ½ lb. 38c; lb. 60c; 2½ lbs. \$1.35; 5 lbs. \$2.40, postpaid.

1390 Reed's Canary Grass

For low marshy land you can't beat Canary Grass. Average yield 5 to 7 tons per acre. Seed rarely germinates above 70% so recommend using 12 to 15 lbs. per acre. Once established lasts for years. High feeding value. Sow in early spring or August. ½ lb. 55c; lb. \$1.00; 2½ lbs. \$2.40; 5 lbs. \$4.50, postpaid.

**1416 Sugar Cane—
for Fodder (Annual)**

Sow in spring in drills 20 lbs. per acre or broadcast 50 lbs. per acre. Makes wonderful silage either alone or drilled with Corn or Soy Beans and will improve materially the feeding value of the Corn. Don't plant until danger of freezing is over. This is not suitable for making Sorghum but strictly for a fodder crop. If cut and fed green, don't pasture the second growth for sometimes the second growth or leaves that come up when wet with dew form an acid, therefore, injurious to stock. ½ lb. 38c; lb. 60c; 2½ lbs. \$1.35; 5 lbs. \$2.40, postpaid.

**1356 Millet—
Golden Beauty (Annual)**

Drill or broadcast 40 to 50 lbs. per acre at corn planting time for early crop and as late as July 15th for early fall crop. For hay crop cut just before it blossoms and cure the same as Clover. High in milk producing quality, being rich in proteins and fats. ½ lb. 38c; lb. 60c; 2½ lbs. \$1.35; 5 lbs. \$2.40, postpaid.

**1358 Millet—
Japanese (Annual)**

Sow 25 to 30 lbs. per acre broadcast after danger of frost is over, for early crop and as late as July 15th for fall crop. Produces excellent forage crop for all livestock. Makes good tonnage per acre and has a high feeding value. Don't let stock overeat but break them into it gradually. ½ lb. 38c; lb. 60c; 2½ lbs. \$1.35; 5 lbs. \$2.40, postpaid.

**1333 Cow Peas—
Whippoorwill (Annual)**

Don't confuse Cow Peas with Field Peas. They are entirely different. Cow Peas are really a Bean and can not be planted until all danger of frost is over. Use 1 Bu. of seed per acre broadcast or 45 lbs. per acre if drilled in rows 36 inches apart. Makes a valuable forage crop and when turned under they furnish abundance of Nitrogen enriching the fertility of the soil. Feed value equal to Alfalfa and Wheat Bran. ½ lb. 38c; lb. 60c; 2½ lbs. \$1.35; 5 lbs. \$2.40, postpaid.

**1343 Canadian Field Peas
Annual**

These are truly Peas and very hardy. They have pea vines that grow 3½ to 4 ft. high. We recommend seeding early with Oats at the rate of 1½ Bu. of each per acre broadcast. The Oats hold the Pea vines off the ground, and produce a larger yield, better quality. For early hay crop they lead the list but should be cut as blossoms appear on the pea plants. ½ lb. 38c; lb. 60c; 2½ lbs. \$1.35; 5 lbs. \$2.40, postpaid.

**1382 Rape—
Dwarf Essex (Annual)**

Very profitable farm crop. Grows 1½ to 3 feet high, with broad, fleshy leaves resembling Turnips, but root system is like Cabbage. Used for hog and sheep pasture but not for cows. Sow in early spring or mid-summer 10 lbs. of seed per acre broadcast. If you add ½ bushel Canadian Field Peas and ½ bushel of Oats or Barley it will enhance the value of the pasture. If you have a tight pasture sow with all small grain and when the grain is cut your hogs and sheep will have a feast until after the extreme cold weather. Very valuable for feeding lambs at weaning time. ½ lb. 38c; lb. 60c; 2½ lbs. \$1.35; 5 lbs. \$2.40, postpaid.

**1348 Hegari
Annual**

A sweet sorghum similar to cane, very nutritious. Valuable for grain, dry fodder, ensilage and pasture. Yields up to 5,000 lbs. of grain per acre and up to 18 tons of silage. Live stock, especially cattle, are very fond of it due to its sweet taste. For grain crop drill in rows 10 lbs. per acre. For forage broadcast 50 lbs. per acre. Grain makes marvelous poultry food. ½ lb. 35c; lb. 55c; 2½ lbs. \$1.25; 5 lbs. \$2.25, postpaid.
